INFOTECH

What is my problem?

- How do I prioritize production orders?
- How do I keep up consistent quality?
- How do I reduce losses & cost?
- How do I make all my operators as best operators?
- How do I take decisions on time to improve further?
- How do I compare different plant's performance?
- How do I analyze my historical reports?

Conclusion

- I need to measure the control variables accurately.
- I need to take actions by comparing measured variables with the targets.
- I need to ensure that my actions are adding values.
- I need to ensure to provide right tools for effective collaboration.
- I need to analyze and compare real-time values with historical values.

What do I Need?

Reduce lead time, costs.
Improve responsiveness,
operations consistency,
reliability.

Increase production
throughput,
product quality,
Reduce energy usage.

Leverage unmatched
capabilities for real-time
plant data visibility of all
operational activities and
KPIs.

Comply with global
standard for integration
with Automation and ERP
systems.

Make all my
operators as the
best operators.

Compliance and
adhering to
business process.

What can I do?

Start by Measuring

Start measuring Downtime, Energy, Productions, Waste, Labor and Cost.

01

Standardize & Benchmark

Benchmark the measures at each layers to meet the targets and standard values.

02

Control & Actions

Conduct review on a specific duration and take actions to meet the benchmark.

03

Continue to Improve

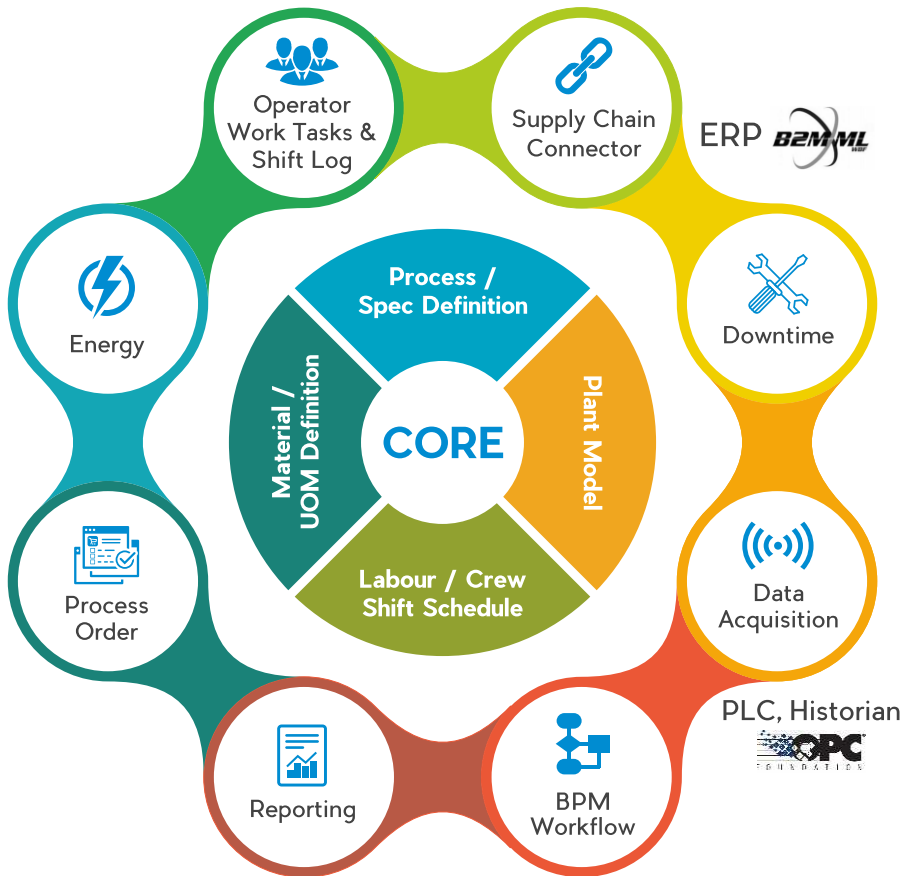

Follow the practices effectively to improve further in a stable way.

04

Our Solution

Kamban FAS software offers you capabilities to handle your problems in a simple and effective approach, provides timely information access for real-time and historical data to plant associates in an actionable format.

-  Configurable web based software solution.
-  Automatic & manual data acquisition for reporting.
-  Effective task & process management, ERP Integration.

A next gen MES/MOM
software application to help
manufacturing plants
throughout the world to
realize their full potential.
